

## Finger Sizing Guide

**Important:** When printing this page be sure your print options are set to “no scaling”, “100% scale”, “as in document”, or similar setting that prevents the printer from stretching/shrinking the contents of this page. Use a ruler to check the measurements shown on the left to be certain the sizes on the printed page are accurate.

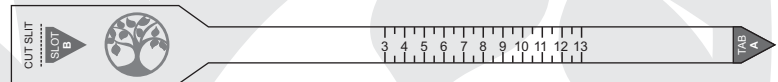

### Option # 1 Measure your finger circumference in mm

- 1) Cut this measurement strip out and wrap it snugly around the base of the appropriate ring finger.
- 2) Use a pen to mark on the measurement strip where it overlaps, forming a complete circle.
- 3) Use this measurement with our international finger size chart to determine your finger size.

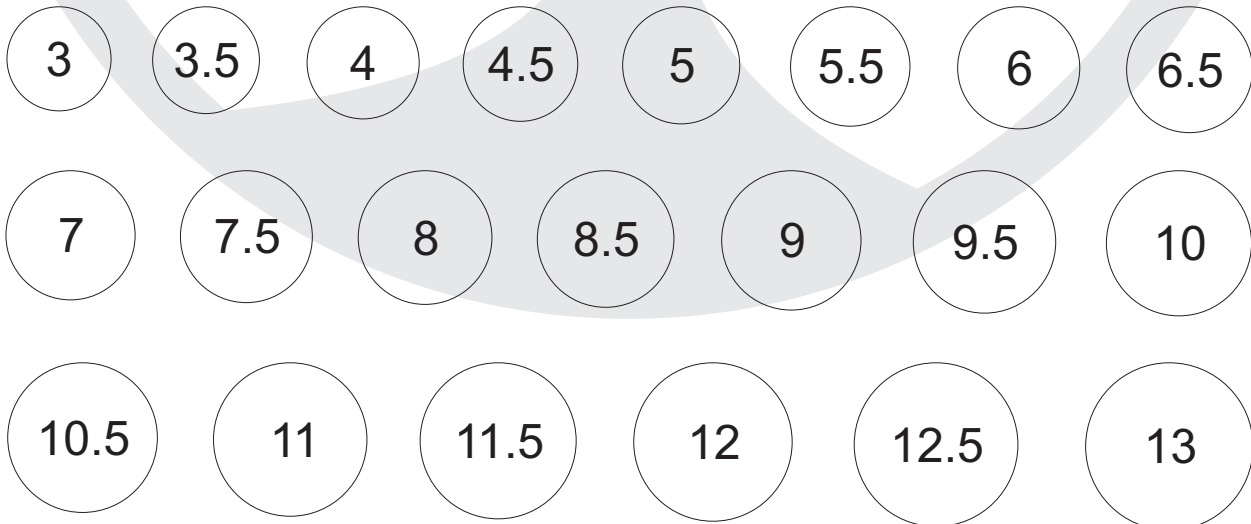

### Option # 2 Tab A through Slot B method

- 1) Cut this paper ring sizer out and cut the dotted slit line near slot B.
- 2) With the numbers facing outward, wrap it snugly around your finger with TAB A sliding through SLOT B.
- 3) The number shown at slot B is your ring size.

### Option # 3 Place an existing ring on the chart below

Using a ring that fits you properly, find the circle below that best matches your ring. The printed circle should be touching the inside of your ring all the way around.

## International Finger Size Chart

Circumference (mm)	Diameter (mm)	USA / Canada	Europe	Great Britain Australia / New Zealand
44.1	14.1	3	4.14	F
44.7	14.2	3 ¼	4.74	F-½
